How to Submit

Entry Portal

All entries should be made through our designated submission portal, linked below.

Awards for Excellence 2025 Portal

If you are making a submission for the Awards for the first time, you will be asked to create an account. If you made a submission in previous years, you will be able to use the identical log-in details.

You can build your entries over the submission window period and edit and amend them before submitting by logging into your account.

Submission Forms

Entrants can make submissions by category and geography.

The portal contains online submission forms with text boxes that correlate to the different criteria relevant to each award category.

Each text box contains guidance that outlines what information you should aim to include.

Methodology

Your Entry

- The entry process is your opportunity to showcase your institution's accomplishments and achievements within the review period (1 January 2024 to 31 December 2024).
- Each entrant should submit via the awards portal by the specified deadline (see page 2). You will be able to amend your entry once it has been submitted up until the deadline, but entries cannot be modified after this date.
- In each entry form, there is the option to submit evidence in text boxes (supporting information can be submitted as attachments). These text boxes align to the criteria Euromoney will use to evaluate entrants for awards.
- We have outlined the type of evidence we would like you to include for each category in the portal and below in the categories. Entrants that provide the information we request are more likely to perform better in our assessments.
- Providing evidence of impact is critical to performing well in assessments. The scoring frameworks used by Euromoney use a matrix that awards more points to those entries that are able to qualify that the examples they have given have been impactful for their business, their clients or the wider industry.
- Entrants should aim to provide supporting documentation – such as strategy decks, performance reports, investor presentations, data tables and charts, and qualitative overviews – to support their claims and illustrate their growth and performance over the review period. All data should be dated.
- Entries *can* include confidential information that we can use to justify the granting of an award. Anything clearly marked confidential will not be used outside of decision-making. Euromoney may use information not marked confidential in awards profiles or research reports.

Assessment and Judging

- We aim to make the process as transparent as possible.
- Entrants will be assessed by a panel of Euromoney's research team.
- Entrants will all be scored using frameworks specific to each category.
- Your entry and any information collected during an interview and secondary research, in addition to our team's knowledge of the market and businesses operating within it, will all contribute to your scores.

Research Interviews

As part of the research process, Euromoney invites entrants to participate in interviews. The interviews are optional, but Euromoney encourages all entrants to take part.

The interviews are an opportunity to expand on and discuss the context of your submission(s).

The interview lengths vary depending on the number of entries covered on a call. Any number of representatives from entrants are welcome to participate in the interviews.

Scoring

Euromoney's team will score entries using scoring frameworks that align to the criteria for each category. Some examples of the criteria Euromoney uses are:

- Growth in market share or financial performance
- Innovation or enhancements in products or services
- Innovation or enhancements in digital offering and technology

How analysts score entries will be based on a scale designed to reward greater evidence of impact.

Award Category Criteria

Each award Euromoney gives recognises the bank or provider that has had the most impact on the industry, its clients or its business through innovating, successfully executing strategies or deals, launching and enhancing products and services and technology, or undertaking impactful initiatives.

Listed below are the award categories and primary assessment criteria used to compare entrants and decide winners.

Entrants should focus on highlighting how their business has developed over the period under determination (**1 January 2024 – 31 December 2024**) on their submissions.

Strong entries are those that can evidence how and why a business has made an impact on its business, its clients or the market through its strategy, products, services and advice.

Entrants should always aim to validate any improvements their business has made in the period under determination with evidence. Some examples of how to validate improvement include demonstrating improved financial performance, returns or added efficiencies for clients, or increased market share.
